a quick and easy web-to-print solution

Your web-to-print system is designed to **compliment** your existing branding.

01 We will build you a private web-to-print system and fill it with your branded templates.

The ordering process is **quick and easy**. Use the system to order print or to download a PDF.

02 Users in your network can log in, edit the templates and place orders 24 hours a day.

04 Run reports each month to keep up to date with the activity across your network.

03 You can review all of the orders before they are completed, if required.

You will have a **complete view** of all the order activity.

Print orders will be despatched within the **agreed turnaround** time.

web-to-print

what is web-to-print?

Web-to-print is a general term which refers to print orders that are transacted online. These orders could be for flyers, leaflets, business cards, stickers, pens or even mugs.

Most web-to-print orders involve an element of personalisation. In this instance a customer would enter their name and contact details into a custom built Template – such as a business card – before confirming the quantity and type of card needed and then 'checking out'.

why use a web-to-print system?

To save time. The traditional process for ordering print would involve contacting a printer, requesting a quote, ordering a new job, waiting for a proof, requesting changes, before finally signing the job off for print. This could take up to a week and then it may then take an additional 5-7 days for the order to be produced. A web-to-print system simplifies this process and allows orders to be placed in minutes, rather than days.

To save money. Costs attributed to paying a designer to make changes are removed as this is done by the user at the time of ordering. A web-to-print system will also allow you to harness your group's buying power – giving access to discounted products and special deals.

To improve brand alignment. A 'brand' is important to every businesses no matter what the size. There is a danger however, that within a large multi-site or franchised network the brand may become diluted. By ordering from Templates on a web-to-print system Head Office has greater control over how the brand can be used, ensuring that it remains consistent throughout the network.

do I need a web-to-print system?

If you find that your central resource is being eaten up with managing print orders, or your brand is being diluted across the network then a web-to-print system can solve these problems for you.

Similarly, if you have a network of people who all need to place print orders using a common brand, then a web-to-print system is the easiest, most cost effective and secure way to enable this.

“why BrandDemand?”

BrandDemand is an easy to use web-to-print system developed by Grafenia plc.

It has been designed with user experience in mind and comes complete with a range of integrated features to make the print ordering process as easy as possible for you and your network.

Take a look at some of these features over the next few pages and discover how a BrandDemand system could benefit your network.

marketing microsite

“The system comes with a clever piece of code which means our users do not need to remember their passwords...”

James Mattam

Director, TaxAssist Accountants

Personalised Microsite

The BrandDemand system is centred around a fully branded marketing microsite. Colours, fonts and your logo are used to customise the microsite to complement your brand. Users from your network securely log in to the private microsite with individual usernames and passwords - keeping everything secure.

Automatic Log in

Already log in to your own company system? This optional feature automatically gives your users access to your BrandDemand system when they are logged into your internal system – eliminating the need to remember multiple log in details.

Files & Images Folder

Think of this as your easy access, central resource to store all your brand components. Company logos, pictures, manuals and documents can be stored here and shared with your network at the click of a button. Files are stored securely and can be accessed wherever you are, whenever you want.

template library

Template Library

Inside the microsite, all of your branded marketing Templates are stored in one easy to access area – the Template Library. You can start off with an initial suite of Templates at launch, and then add to the library over time to reflect your changing ideas and marketing initiatives.

When a user in your network is ready to order, they simply browse through the library, choose a Template, and personalise it with their details before placing an order.

Folder Management

The marketing Templates can be sorted into folders and named by product type, service type, season, etc. to make them easy to find. Templates can be made visible to the whole network, or to individual users as required and can appear in multiple folders too.

Fixed -v- Flexible

You decide which areas of the marketing Templates should be editable and which areas should be locked. Your Client Service Team will apply your preferences to your Templates, ensuring that your network can only use them as you intended. See page 13 for more details on how templates work.

Active Updates

A clever, time saving tool that will pre-fill the Template with certain details when a user opens it. Information is drawn directly from the user's account information - saving time and also reducing the risk of transcription errors.

BrandDemand offers intuitive
Templates with the widest range of
low cost print deals.

management tools

BrandDemand gives you the ability to run online reports, enabling you to monitor marketing activity across your network.

Management Tools

The BrandDemand system contains a suite of management tools to enable your central marketing team to control user access and efficiently oversee the marketing activity throughout your network.

Only users with 'Administrator' access level will have access to these tools.

Manage Your Users

Quickly create new accounts for branches or individual users, control access to your system, assign access levels and settings to users depending on their role.

Approval+

This feature allows you to check and approve artwork centrally, before the order proceeds to print. This feature can be disabled for experienced users who understand your brand guidelines, and enabled for new or inexperienced users.

Marketing Credits

Marketing credits enable centrally funded marketing initiatives to be managed in an efficient way. Credits are easily created and allocated against individual branches to use against their next order. Ideal for starter packs, to encourage the use of a new initiative or as a reward.

Reports & Analytics

Access and download reports detailing your network's marketing activity 24/7. Understand who is ordering what, and importantly who is not.

on-going support

Your Client Service Team will be named contacts with a sound understanding of your objectives.

System Support

We know that learning to use a new system can sometimes be a challenge, especially when you have a large network of users to consider. With BrandDemand you get access to all the help you need to get the system up and running, as well as on-going support to answer day-to-day operational queries once the system is in use.

Your Client Service Team

At the start of the project, you will be assigned a Client Service Team. These named contacts will be available on an on-going basis to provide system support to you and your network.

Training

Once the system has been built, you can choose to roll it out in stages, or launch across your whole network at once. Either way, your Client Service Team will provide training to all users, which will be delivered via webinar or regional seminars as appropriate.

Design Service

Need design at short notice? Your Client Service Team can offer graphic design services for last minute, or one off projects. Similarly, if you wish to rebrand, we can offer design packages to suit with the added benefit of updating your Template library at the same time.

Margetspace products

Print Products

BrandDemand includes a ready-made print supply chain. It is fully integrated with the extensive Margetspace product range – 6,000+ product options, each with an agreed turnaround time. Our range covers print essentials, fancy finishes, signage, branded furniture, flags, exhibition displays and graphics.

Print Discounts

Harness your network's buying power with access to our exclusive members-only pricing, typically reserved for trade-only online clients.

Turnaround

Our most popular ranges are available with next day delivery. If you're not in a rush, choose our standby service and grab a discount.

Production

All our print orders are produced in our UK based production hub. The hub is equipped with the latest technology to ensure the highest quality for your products.

The BrandDemand system can also be used to order items that fall outside of the Margetspace product range and branded stock pick items such as pens, clothing and mugs.

Product scanning throughout the process ensures traceability at every stage.

franchise tools

“Branding is complex but at its core, consistency is paramount.”

Peter Gunning
CEO, Grafenia plc

Franchise Printing

The BrandDemand system has been developed by Grafenia plc – a Franchisor since 2002. Grafenia understands franchising and the complex relationship between Franchisee and Franchisor.

Studies have shown that the ‘Brand’ is one of the most important considerations for prospective new franchisees, so keeping it strong and consistent is essential.

BrandDemand provides a platform that satisfies the print requirements for a franchise network, encompassing the entrepreneurial characteristics of the Franchisee as well as maintaining brand alignment for the Franchisor. Many of the BrandDemand management tools have been built with the needs of a Franchise network in mind.

pdf downloads

**BrandDemand is
an open system
and can support
Templates for your
existing suppliers.**

PDF Downloads

BrandDemand can also be configured to allow PDF downloads*. This means that once a user has personalised a Template - they can choose to download a PDF instead of ordering a printed item.

This PDF could be sent to a preferred supplier for printing or emailed to a newspaper for use as a press advert. This enables the system to provide a complete solution for all your marketing requirements.

*PDF generation charges apply.

how templates work

Colours can be fixed to reflect house styles or open to user selection.

How much control is given over the **font** itself? Font style, point size, and colour is again under your control.

No more reflow issues! If additional text is added to a text box which is fixed in size, the BrandDemand system will intuitively **reduce the point size** (to a sensible level) or reject the additional text, according to your rules.

Each field can be specified '**Editable**' or '**Non Editable**'.

Photos could be locked within the Template or a user could change the image to an alternative from the Files and Images Folder.

UK EXPERTS IN MINOR CAR BODY REPAIRS

EVEN THE FINEST BODIES NEED A LITTLE WORK!

High quality mobile repairs at a fraction of bodyshop costs. We come to your home or office. All car body repairs come with a lifetime ownership guarantee*.

revive!
setting new standards in mobile car care

*For full Lifetime Ownership Guarantee terms and conditions please visit the Revive! website.

It is easy for new images to be added to the **Files and Images Folder**. Centrally, this could reflect a new photo shoot or locally, a User adding a logo reflecting membership of a local Chamber of Commerce or Trade Association.

Underpinning the BrandDemand system is the **Files and Images Folder**; an image library containing your logos, photos, icons, maps etc. Essentially all of the digital assets that represent your brand.

roadmap

6 steps to make it happen

1 Exploratory meeting

This provides an opportunity for you to find out more, to ask questions and for us to show you a mock up of how a BrandDemand system would look for your network. This is usually conducted over a 40 minute webinar.

2 Proposal

A formal written proposal detailing the offer to develop a BrandDemand system, together with a proposed product discount matrix based on the size of your network and anticipated use.

3 Engagement

A detailed Service Level Agreement, setting out the day-to-day operational parameters. This would also detail the commitment to Template updates, performance reporting and evaluation.

4 Impact day

The Impact Day ensures all the right people are in place to specify what Templates you need and what you want them to do. Depending on the scope of the system we aim to deliver the full system within 2-4 weeks from Impact Day.

Impact day - all the right people in one place to contribute, including your external creative agency if appropriate.

5 Launch

Depending on your company's size and structure, we will roll the system out either in stages or in one national launch. We can also adapt training to meet your requirements using either face-to-face regional seminars, or online webinars.

6 Performance evaluation and system development

Your Client Service Team can present the results of on-time production and Template creation as part of an overall service evaluation.

Adaptability and the addition of new Templates are key to keeping the system up-to-date; accordingly additional Templates can be added on an on-going basis.

prices

savings

By using the BrandDemand system, your network will be able to leverage their group buying power and gain access to our exclusive members-only pricing, typically reserved for trade-only online clients.

In addition to this, they will benefit from monthly offers of up to 50% off selected products.

The BrandDemand system also eliminates amendment fees on a job-by-job basis – automatically saving an average of £30 per print order.

cost

The implementation and licence fees for the BrandDemand system and its associated benefits are £1,000 per company.

The BrandDemand Licence Fee Covers;

- System set-up;
- 10 Templates (with additional Templates charged at £25);
- Preparation of the Files and Images Folder;
- Client Service Team consultants on the Impact Day;
- Training for the entire network;
- Personalised demonstration video.

There's a low monthly subscription fee, based on the number of users who access the BrandDemand system:

- £99 per month for up to 10 users;
- £199 per month for 11 to 25 users;
- £299 per month for 26 to 100 users;
- £399 per month for 101 to 250 users;
- £499 per month for 251 to 500 users.

Prices are subject to VAT.

“Introducing the BrandDemand system was about getting better brand alignment across our network and finding one more way for our franchisees to save money...”
